

Narendra Ravulapalli

+91-9392559023 | narendraravulapalli@email.com | linkedin.com/in/narendraravulapalli | Vijayawada, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Motivated IT undergraduate and Full Stack Developer with hands-on experience in Python, JavaScript, and the MERN stack. Skilled in building web applications, AI/ML integrations, and NLP-powered tools. Certified in Java, JavaScript, Network Security, and AI/ML. Actively seeking entry-level software development or full stack roles to contribute to impactful projects.

EDUCATION

Devineni Venkata Ramana & Dr. Hima Sekhar MIC College of Technology <i>Bachelor of Technology – Information Technology</i>	Vijayawada, AP June 2023 – December 2027
Krishnaveni Junior College <i>Intermediate – Board of Intermediate Education AP</i>	Andhra Pradesh March 2021 – March 2023
AP Residential School (Boys) <i>Secondary School Certificate (SSC) – BSEAP</i>	Andhra Pradesh June 2020 – June 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Streamlit, OpenCV, NumPy, Ultralytics (YOLO)
AI / ML / NLP: Natural Language Processing, SpeechRecognition, PyAudio, Machine Learning
Full Stack: MERN Stack (MongoDB, Express, React, Node), REST APIs
Tools & Platforms: Git, GitHub, VS Code, Postman
Databases: MongoDB, MySQL

PROJECTS

- AI-Powered Speech Recognition Web App** | *Python, SpeechRecognition, PyAudio, Streamlit*
- Built an end-to-end speech-to-text web application using Python SpeechRecognition and PyAudio libraries.
 - Integrated Streamlit for a clean, interactive UI allowing real-time voice input and transcription display.
 - Applied NLP techniques for post-processing transcriptions to improve output accuracy.
- Object Detection System** | *Python, Ultralytics YOLO, OpenCV, NumPy*
- Developed a real-time object detection pipeline using Ultralytics YOLOv8 and OpenCV for video/image streams.
 - Implemented bounding box rendering and class labeling with NumPy-based frame processing.
 - Optimized detection performance for multiple object categories with configurable confidence thresholds.
- Full Stack Web Application** | *MongoDB, Express.js, React.js, Node.js (MERN)*
- Designed and developed a full stack CRUD application using the MERN stack with RESTful API architecture.
 - Built responsive front-end components with React.js and handled back-end routing with Express.js and Node.js.
 - Used MongoDB for flexible, schema-less data storage and retrieval.
- Flask REST API Service** | *Python, Flask*
- Created lightweight REST API endpoints using Flask to serve data to front-end clients.
 - Implemented request handling, routing, and JSON response formatting for seamless client-server communication.

CERTIFICATIONS

- Java SE 8 Programmer I
- JavaScript Specialist Certification
- MERN Full Stack Development with Project – Virtual Internship
- Fortinet Network Security Expert Level 3: Certified Associate
- Artificial Intelligence & Machine Learning
